## D & H FIELD SERVICES MECHANICAL & FABRICATION SOLUTIONS

# SERVICES & CAPABILITIES

D&H Field Services is a vertically integrated service division of D&H Equipment, Ltd. Our Field Services division provides a comprehensive range of professional services. We specialize in turnkey terminal design and construction services for the asphalt and emulsion industry. We also cater to other terminal projects such as; fuels or light end products, crude oil, bio-diesel facilities and chemical plants. For more detailed information please visit our website at [dhequip.com](http://dhequip.com)

## OUR MISSION

D&H Field Services is dedicated to creating a safe workplace. We listen to our customers and provide solutions based on what specific needs they have. Our main goal is to provide excellent customer service, we value each customer and deliver quality manufacturing and superior field service at a competitive price.

## Our Field Services & Capabilities Include:

1. SITE ASSESSMENT SERVICES
2. DESIGN & ENGINEERING SERVICES
3. DESIGN-BUILD SERVICES
4. MODULAR FABRICATION
5. MECHANICAL SERVICES

# SITE ASSESSMENT SERVICES

Our Field Services division provides front-end and preliminary project guidance to assist our clients with their project and evaluate initial requirements our clients have. Our Site Assessment Services provides specific details on developing your project.

We gather specific needs from our clients and develop a strategic plan to highlight requirements your project will need. Developing this is an important and often overlooked phase. Our Field Services division can identify and provide answers to those difficult questions you may have. If you are considering site assessment and would like more information please contact our office at 830.833.5366.

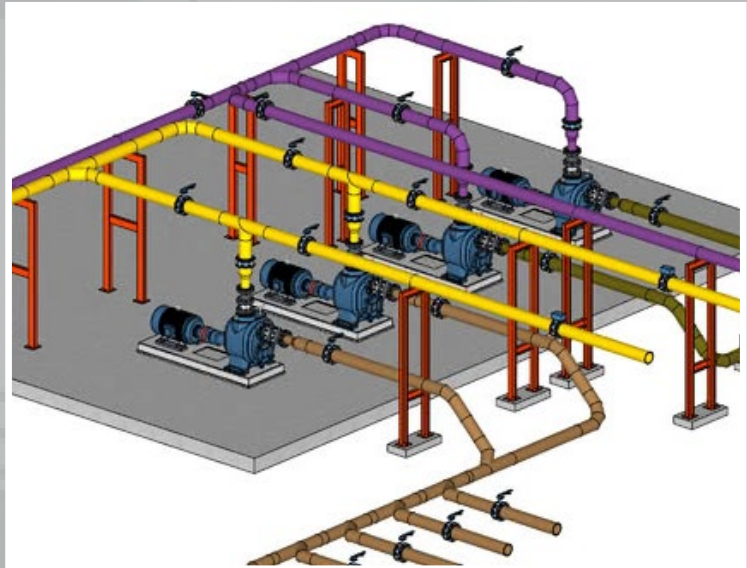

## Site Assessment Services Include:

- ✓ Site Evaluation
- ✓ Thermal Imagery Evaluation
- ✓ Civil & Site Analysis
- ✓ Project Estimating and Planning
- ✓ SWPPP (Stormwater Pollution Prevention Plan)
- ✓ Site Containment Evaluation

# DESIGN - ENGINEERING SERVICES

Our in-house design and engineering team provides conceptual designs, preliminary layouts, process piping design, mechanical and structural design packages specifically designed to meet our client's needs.

We provide practical solutions to the design process and have the engineering expertise to complete your project in an efficient and cost-effective manner.

## Design - Engineering Services Include:

- ✓ AutoCAD, 2 and 3D Modeling
- ✓ Conceptual and Preliminary Design
- ✓ P&ID and PFD Design
- ✓ Process Piping Design
- ✓ Mechanical & Electrical Design
- ✓ Structural Design
- ✓ Automation Control Systems

# DESIGN-BUILD SERVICES

Our design and engineering team will take your project from the initial concept through design, manufacturing, equipment integration, site construction and installation. Our Field Services division can assist you with terminal process piping and equipment expansion projects to large capital projects, offering a single source for installation and site construction.

At D&H Field Services we offer solutions for a single piece of equipment installed to providing turn-key design-build terminal construction. If you are considering terminal upgrades and expansion, or if you are looking for asphalt and emulsion storage contact our office at 830.833.5366, or visit our website at [dhequip.com](http://dhequip.com)

## Design-Build Services Include:

- ✓ Project Development
- ✓ Site Development
- ✓ Equipment Procurement
- ✓ Project Management
- ✓ Construction Management
- ✓ Site Construction

# MODULAR FABRICATION SERVICES

At our Blanco, Texas manufacturing facility we have over 45,000 square feet of fabrication space to assemble pre-fabricated modular systems for process piping, process skids, asphalt blending systems and structural steel. Through our diverse engineering expertise, D&H Field Service designers and engineers are able to systemically define each component of our modular design and fabrication process.

Our design experience and fabrication capabilities provide our clients with a streamline approach to design and fabrication for their project. Utilizing pre-fabricated modular systems reduce site safety risk, reduce the project life cycle and in some situations can reduce the overall cost of the project.

## Our Modular Fabrication Services Include:

- ✓ Process Piping
- ✓ Piping Spools
- ✓ Customized Modular Skids
- ✓ Process Equipment Skids
- ✓ In-Line Blending Skids
- ✓ Spool Piece Fabrication
- ✓ Structural Steel
- ✓ Loading Racks
- ✓ Stairs and Handrails
- ✓ Cross-overs and Walkways

# MECHANICAL INSTALLATION SERVICES

D&H Field Services provides mechanical installation services for process piping, structural steel, asphalt blending equipment, process equipment tie-ins, heating systems, and much more.

Let our experienced team assist you in defining the project requirements, specification of equipment needed and to complete your project, install a fully integrated system utilizing our mechanical installation service for your asphalt or emulsion terminal. In addition to our mechanical services, our Field Service Division can provide you with turnkey design-build terminal construction for asphalt and emulsion storage. Contact our office at 830.833.5366 for more details please visit our website at [dhequip.com](http://dhequip.com)

## Mechanical Installation Services Include:

- ✓ Asphalt & Emulsion Terminals
- ✓ Polymer Blending Plants
- ✓ Field Fabrication & Welding Services
- ✓ Emulsion Control Systems
- ✓ Process Blending Systems
- ✓ Process Piping
- ✓ Hot Oil Heating Systems
- ✓ Heat Trace & Insulation
- ✓ Pump & Mill Skids
- ✓ Equipment Installation & Tie-Ins
- ✓ Tank Coil Installation
- ✓ Modular Fabrication
- ✓ In-Line Blending Systems
- ✓ Shop-Built Storage Tanks
- ✓ Polymer Concentrate Tanks
- ✓ AST-API 650 Storage Tanks
